

# HEATED STEERING WHEEL

COPER18 model

Industry first Heated steering wheel , to keep your hands warm and comfortable !!

Currently available for steering wheel models MAKAIRA (full stainless grip) and COPER18 (leather grip).

- On/off switch
- Two NTC sensors controlling real grip temperature and environment temperature
- External control unit with temperature monitoring software and thermal safety cutoff switch to prevent overheating
- Max 7 turns lock to lock

Once the heated steering wheel has been turned on, it will operate for approximately 5 to 30 minutes before automatically going in stand by position, when a certain temperature is reached (MAT = max achievable temperature).

The heated function may not turn On when the environment temperature is over a certain temperature (MST = maximum starting temperature).

MAT and MOT are customizable
